

How do you use GenAI for coding?

Benedict Westhenry

- This session will help inform developing a community of Practice focused on the responsible and effective use of Agentic AI systems for coding in research, our aims are:
 - To develop a position on the best practices for the responsible and effective use of these tools, and principles of AI in research.
 - To disseminate guidance and develop training in these best practices.
 - To advocate for resources from the University of Bristol to support researchers at the institution in using Agentic AI tools and following these best practices.
